

Can you say MONOPOLY?

Relaxing the restrictions on how many tv/radio stations a company can own is just crazy and limits everyone on content. If there is no competition then how will things get better? Competition drives every one of us to do better. If you take that away then you take away that drive and you end up with only a few holding the power of what you see or hear and that is the worse thing that could be done. I live in Sacramento where one company now owns and runs 4 different stations in the same market and it is terrible. You end up with the same old hashed out corporate bureaucracy. I believe it would be dangerous to let so few hold so much power over what we watch and hear. Please vote NO on loosening the restrictions of how many tv/radio stations one can own.
